

# Spill-Safe Containment Units

## Collapsible Composite Spill Containment Pools

CLEAR Solutions' Spill-Safe Containment Units are portable, collapsible spill response pools designed to assist in spill containment for fluid processing applications. These spill containment pools are especially useful in applications where the fluid being processed is particularly messy or difficult to clean up.

The Spill-Safe can be placed directly under filtration equipment to catch overflow or drips that occur when changing out filter media or draining filter vessels. These spill containment units come in two sizes: 27 gallons and 90 gallons. Each unit features an inner layer of triple wall corrugation and an outer layer of coated polypropylene with a 6-mil low density polyethylene liner.

The Spill-Safe is collapsible and can be folded down to allow for efficient storage and transportation. This also allows it to be used as a portable decontamination pool for field personnel.

### Features

- Available in two sizes:
  - 27 Gallon
  - 90 Gallon
- Fully collapsible and portable
- Easily fits in most vehicles
- Saves hours of clean up time
- Light weight and easy to use

### Applications

- Botanical Extraction
- Field Decontamination
- Food and Beverage
- Chemicals
- Cosmetics
- Oil and Gas

### Materials of Construction

- **Inner Layer:** Triple Wall Corrugated Fiberboard
- **Outer Layer:** UV Treated High Density Polypropylene
- **Liner:** 6-mil Low Density Polyethylene

### Specifications - 27 Gallon

- **Volume:** 27 gallons
- **Tare Weight:** 2 lbs
- **Dimensions**
  - Expanded:** 30" x 30" x 7"
  - Collapsed:** 4" x 30" x 9"

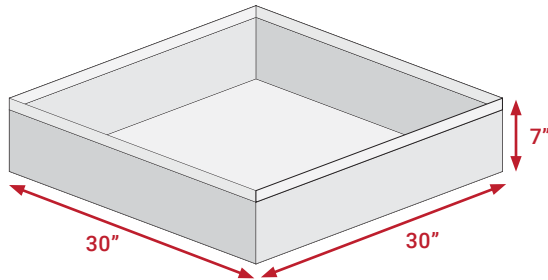

### Specifications - 90 Gallon

- **Volume:** 90 gallons
- **Tare Weight:** 3 lbs
- **Dimensions**
  - Expanded:** 42" x 42" x 12"
  - Collapsed:** 4" x 42" x 14"
